SERVICES WE OFFER

Recovery Management

helps you plan your recovery. This includes helping you get services in this program and finding other tools as well as services in the community. They will also help you solve problems and make good choices

Substance Use Disorder

includes meetings to help you deal with drug addiction

Rehabilitation services

train you on different skills so you can be successful and more independent

Adaptive AIDS

are items that can help you function in your own home and be safe and healthy

Nursing

will help you with questions about medications. A nurse will also help with long term health problems you may have

Community Psychiatric Supports and Treatment

are meetings with a therapist to help you reach your goals

Transition assistance

helps with buying needed items for your new home like dishes, sheets and furniture. We may also help with money deposits like rent or electricity for your new place

Residential services

help with daily living-bathing, dressing, chores, walking or moving around, and planning or cooking meals. We will even help find ways to get you where you need to go and help you get involved with things you like to do.

Employment services

help you find a job of your choice in your

Home - delivered meals

are healthy meals delivered to your home

Respite care

provides short-term help and relief for your family if they provide care for you

Transportation services

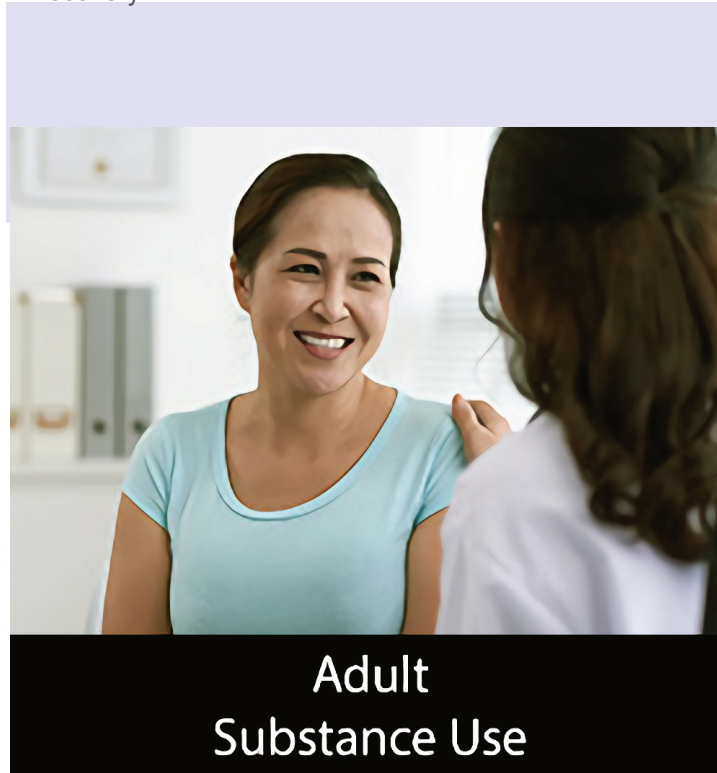

help get you to program services and other places you need to go

Small home improvement and minor home modification

help with physical changes you need at home to be safe

Peer support

includes meetings with someone who is also in recovery and understands first-hand what might be going through. They can help you with stress, problem solving and staying hopeful so you can reach your recovery
